Oswell Chan, Software Developer @ Acronis

WHAT IS

# Optical Character Recognition

the mechanical or electronic conversion  
of images of typed, handwritten or printed  
text into machine-encoded text

tesseract-ocr / tesseract

Code Issues 98 Pull requests 14 Projects 0

Tesseract Open Source OCR Engine (main repository)

1,759 commits 5 branches

Branch: master ▾

New pull request

 zdenop fix #712: Ghostscript mangling Tesseract-produced PDFs

 android	Update Android.mk
 api	remove obsolete OpenCl code from
 arch	Implement SIMD detection on macO
 ccmain	fix #537: Error in pixClone: pixs not d
 ccstruct	clang-tidy changes from sync
 ccutil	clang-tidy changes from sync
 classify	Fix typo in comment
 cmake	Update SourceGroups.cmake
 contrib	helper script to generate dawg input
 cutil	Merge pull request #531 from stweil/
 dict	Fix building of training tools in share

# TESSERACT OCR PACKAGE

## Developers

Lead Developer: Ray Smith

Maintainer: Zdenko Podobny

## Package

libtesseract (OCR Engine)

tesseract (cmd-line program)

# TESSERACT OCR

## CMD-LINE

tesseract --print-parameters

```
editor_image_xpos    590  Editor image X Pos
editor_image_ypos    10   Editor image Y Pos
editor_image_menuheight 50  Add to image height for menu bar
editor_image_word_bb_color 7   Word bounding box colour
```

...

```
textord_noise_rowratio 6   Dot to norm ratio for deletion
textord_blshift_maxshift 0   Max baseline shift
textord_blshift_xfraction 9.99 Min size of baseline shift
```

678 parameters!

```
Usage:
tesseract --help | --help-psm | --version
tesseract --list-langs [--tessdata-dir PATH]
tesseract --print-parameters [options...] [configfile...]
tesseract imagename|stdin outputbase|stdout [options...] [configfile...]
```

OCR options:

- tessdata-dir PATH Specify the location of tessdata path.
- user-words PATH Specify the location of user words file.
- user-patterns PATH Specify the location of user patterns file.
- l LANG[+LANG] Specify language(s) used for OCR.
- c VAR=VALUE Set value for config variables.  
Multiple -c arguments are allowed.
- psm NUM Specify page segmentation mode.

NOTE: These options must occur before any configfile.

Page segmentation modes:

- 0 Orientation and script detection (OSD) only.
- 1 Automatic page segmentation with OSD.
- 2 Automatic page segmentation, but no OSD, or OCR.
- 3 Fully automatic page segmentation, but no OSD. (Default)
- 4 Assume a single column of text of variable sizes.
- 5 Assume a single uniform block of vertically aligned text.
- 6 Assume a single uniform block of text.
- 7 Treat the image as a single text line.
- 8 Treat the image as a single word.
- 9 Treat the image as a single word in a circle.
- 10 Treat the image as a single character.

Single options:

- h, --help Show this help message.
- help-psm Show page segmentation modes.
- v, --version Show version information.
- list-langs List available languages for tesseract engine.
- print-parameters Print tesseract parameters to stdout.

# TESSERACT OCR CMD-LINE

mmedlately on arrival al Prague's Ruzy'nc Prlsun m Augusr 1999, Tomas Machacck pul in a request to lhe governor rhal he he placed In selllary confinement. "I had no choice," he explained. "They would have killed

mmedlately on arrival at Prague's Ruzyne Prison in August 1999, Tomas Machacek put in a request to the governor that he be placed in solitary confinement. "I had no choice," he explained. "They would have killed me. No question. There were a lot of Russians there."

It had been a hard fall for Machacek. Five years earlier, he had been recognized as one of the most promising young policemen in the Czech Republic when at the age of just twenty-six he was appointed leader of ALFA, the new anti-Russian organized crime unit. Now he was incarcerated in the same isolation block where Czechoslovakia's erstwhile Communist leaders had once locked up Václav Havel. An honest cop in a corrupt system, Machacek is a real-life Arkady Renko, the quietly intelligent detective in Martin Cruz Smith's novels *Gorky Park* and *Stalin's Ghost*, engaged in a quixotic struggle with much more powerful and darker forces.

Machacek's downfall could be traced to the moment of his greatest success. In May 1995, working on a tip-off that a murder was being planned,

Maehaele's downfall could be rraeed lo lhe moment ofhis grearesl sue.

eess. In May ms, working on a tipeoff ehal a murder was hung planned

# TESSERACT OCR

## TESSEROCR

Tesserocr (2.1.3)

- i. libtesseract (>=3.04)
- ii. libleptonica (>=1.71)
- iii. Cython (0.25.2)

```
$ CPPFLAGS=-I/usr/local/include pip install tesserocr
```

```
$ python setup.py build_ext -I/usr/local/include
```

sirfz / tesserocr

Code Issues 4 Pull requests 0 Projects 0

A Python wrapper for the tesseract-ocr API

optical-character-recognition ocr tesseract

61 commits 3 branches

Branch: master New pull request

sirfz bumped version to 2.1.3

File	Description
tests	load and close image file to avoid
.gitignore	initial commit
.travis.yml	finalized list of supported python v
LICENSE	updated setup file, embedded versi
MANIFEST.in	exclude cpp from dist
README.rst	do not fail if pkg-config fails to fin
setup.py	do not fail if pkg-config fails to fin
tesseract.pxd	Implemented DetectOS API method
tesserocr.pyx	bumped version to 2.1.3
tesserocr_experiment.pyx	some new misc tests

# TESSERACT OCR

## TESSEROCR

```
from PIL import Image
from tesserocr import PyTessBaseAPI, RIL

image = Image.open('./test/cropped/test21.jpg')
with PyTessBaseAPI() as api:
    api.SetImage(image)
    boxes = api.GetComponentImages(RIL.TEXTLINE, True)
    print('Found {} textline image components.'.format(len(boxes)))
    for i, (im, box, _, _) in enumerate(boxes):
        # im is a PIL image object
        # box is a dict with x, y, w and h keys
        api.SetRectangle(box['x'], box['y'], box['w'], box['h'])
        ocrResult = api.GetUTF8Text()
        conf = api.MeanTextConf()
        print((u"Box[{}]: x={}, y={}, w={}, h={}, "
               "confidence: {}, text: {}").format(i, conf, ocrResult, **box))
```

A large, stylized Python logo is positioned on the left side of the slide. It features two interlocking snakes, one blue and one yellow, forming a circular pattern. The snakes have white eyes and are set against a light gray background.

# THE END LESSONS LEARNT

## OCR is hard

Nigh impossible to intuit

## Constrained images

Tesseract works best with  
smaller constrained images

## Constrain user

Hard to engineer solution  
that works for every scenario

# THE END WHAT'S NEXT

## Performance

Can we do better?

## Bug Fixing

Identify the reason for  
“random” crashes

## Accuracy

Tesseract 4.0 w/  
LSTM

# THE END
